Paschal Chukwubuikem Ifewulu

IT Student & Editor

A highly motivated IT student from Nigeria currently studying in Belgium, with hands-on experience in JavaScript, Java, and Python. Proficient in web development using HTML5, CSS, SASS, FastAPI, Laravel, Livewire, and PHP. Adept at database management with MySQL and MongoDB, and passionate about software engineering and AI solutions. Skilled in developing innovative, scalable applications and eager to leverage both technical expertise and soft skills such as teamwork, communication, problem-solving, and adaptability to contribute effectively to cutting-edge projects. Committed to continuous learning, growth, and staying ahead in the ever-evolving tech landscape.

Work history

Bachelor of Applied Computer Science

September 2023
Current

- Various projects:
- Created ERD diagrams and put the information from the diagram in SQL.
- Created a website from my first web designing course focusing on different themes.
- Worked with Linux and PowerShell on operating systems.
- Developed an advanced website, working on the Frontend and Backend of the website using SASS and Fast API.
- Used java and thyme leaf to create a local website and worked on the communication between the website and customer/user.
- Created an Arduino Ultrasonic Obstacle Avoidance and Voice control car.
- Scrapped data from websites using beautiful soup and Regex.
- Made application using laravel, livewire, php, tailwind and alpine
- Created various Data visualization projects.
- Worked collaboratively on various group projects, developing skills in teamwork, communication, and project management.
- Trained data with AI with the use of models.
- Coached a growing micro-finance institute "NAGRO SACCO" in with the assistance of my senior coach in a school programme taken place in uganda, ran by OVO(Ondernemers voor Ondernemers vzw).
